# Only Text – Free Tool to Remove Emojis, Bullet Points & Formatting

Only Text is a free online tool that removes unwanted symbols from any text, leaving you with just plain text. In other words, it's an all-in-one emoji remover, special characters remover, and bullet point remover. Quickly strip out bullet points, emojis, special characters, even AI-specific markers, from your text. Perfect for cleaning up AI-generated content or text from emails, documents, and LinkedIn posts so you're left with only the text you need.

### Use the Tool

## Why Use Only Text?

- ✓ **Save Time:** No more manual deleting. Remove emoji from text, bullet points, and other unwanted characters in seconds.
- ✓ **Plain Text Anywhere:** Get a clean plain text output that's ready to use in emails, documents, or any platform – without weird formatting issues.
- ✓ **AI-Proof Your Text:** Remove any AI symbols or formatting quirks left by text generators so your content looks natural and professional.
- ✓ **Free & Easy:** 100% free online tool with no sign-up or installation. Just paste, click, and copy your cleaned text.

## From the Blog

### Why AI Outputs Need Cleaning

AI-generated text isn't always ready to use out-of-the-box. Whether you use ChatGPT or another AI writer, the output often contains extras like lists, bullet points, emojis, or strange formatting that can clutter your content. In this blog post, we explore why cleaning up AI outputs is so important. From improving readability to avoiding hidden AI markers, discover how a quick clean-up can make AI-generated text more reliable and easier to work with. It's all about ensuring the quality and integrity of AI content before you use it. By making a few simple tweaks, you can ensure your AI-written content is polished and ready to go.

## How to Quickly Get Plain Text from LinkedIn Posts

Ever tried to copy a LinkedIn post, only to paste a mess of icons, formatting, and odd characters? You're not alone. LinkedIn posts often contain emojis and special symbols that don't transfer well into emails or documents. In this article, we show you how to instantly remove formatting from text copied from LinkedIn or any other platform. With the right tool, you can convert rich text into plain text in just a few clicks — perfect for saving or sharing without the clutter. For content creators and professionals, this simple trick can save a lot of cleanup time.
